STRONG GROWTH IN EARNINGS ACROSS ALL MAJOR COUNTRY UNITS IN 2004

- INCOME BEFORE REALIZED GAINS AND LOSSES ON SHARES AND REAL ESTATE INCREASED 22% TO EUR 1,783 MILLION (30% at constant exchange rates)
- NET INCOME INCREASED TO EUR 1,663 MILLION COMPARED TO EUR 1,033 MILLION IN 2003
- PROPOSED FINAL DIVIDEND OF EUR 0.21, A 5% INCREASE

The Hague, March 3, 2005

"Throughout the preceding year, we have continued to focus on profitably growing our core lines of business and we are particularly pleased that all of AEGON's major country units contributed to the improved results for 2004. The more favorable economic environment has enhanced the growth prospects for our business. AEGON improved its capital strength over the last year and further expanded its broad multi-channel distribution capabilities. We are confident that AEGON's companies throughout the Americas, Europe and Asia are well-positioned to serve the developing needs of our customers.", said AEGON's Chairman of the Executive Board Donald J. Shepard.

AEGON reported higher results for the year 2004, driven by a broad-based improvement in profitability across the entire group. During the past year, AEGON's core operations were strengthened by new distribution agreements and enhanced strategic cooperations. Examples of this include the successful start of the partnership with Caja de Ahorros del Mediterráneo in Spain, the national cooperation agreement with the Agricultural Bank of China and the expansion of the activities and partnership in France through the increased stake in La Mondiale Participations. In line with AEGON's commitment to its core business, AEGON concluded the divestiture of the non-core Transamerica Finance Corporation (TFC) operations. During the year, the largest part of the

Based on the weighted average number of common shares, adjusted for repurchased own shares.

Included in this report are financial measures, pre-tax as well as after-tax, that exclude realized gains and losses on shares and real estate and exceptional items. Net income before realized gains and losses on shares and real estate and before exceptional items is a non-GAAP measure. Management uses this non-GAAP measure, in addition to GAAP measures, as an indicator of AEGON's financial performance and believes that the presentation of this measure provides useful and important information to analysts and investors. This non-GAAP measure should be seen as part of a range of supplementary measures, that assist in achieving greater transparency and understanding of insurance reporting and can help investors and analysts in comparing AEGON with its peers. Reconciliation of this measure to the most comparable GAAP measure is provided on page 25.

² Based on the number of common shares outstanding at the end of the period, adjusted for repurchased own shares.

remaining businesses, the finance and container leasing operations, were sold. With the recent announcement of the signing of the agreement for the sale of the European trailer business this disposal program will be completed.

In 2004, standardized new life production showed an increase in the Americas, particularly reflecting ongoing growth in the agency channel and expanded relationships with banks. Life production in the United Kingdom also increased, demonstrating consistent growth in the core pension business. During the fourth quarter, life production in the Netherlands and Taiwan showed marked improvement over the previous quarters of the year, although it did not keep pace with 2003 levels. Variable annuity production in the Americas showed similar improvement in the fourth quarter.

The Executive Board will propose a 2004 dividend of EUR 0.42 per common share, representing a 5% increase compared to the prior year. Taking into consideration the interim dividend paid in September 2004, the proposed final dividend amounts to EUR 0.21 per common share. This reflects the improvement in cash flows from the business, AEGON's continued capital strength and confidence in its business.

Income before realized gains and losses on shares and real estate increased 22% to EUR 1,783 million in 2004 (30% on a constant currency exchange rate basis). The increase, to which all major country units contributed, mainly reflects improved credit and equity markets and actions taken by management to improve product spreads and overall profitability. Income before realized gains and losses on shares and real estate in the fourth quarter of 2004, which includes a one-off charge totaling EUR 64 million (USD 80 million) related to reinsurance business in the US, decreased by 10% to EUR 405 million when compared to EUR 449 million in the same period in 2003. The decline primarily reflects exchange rate differences and the results from TFC, which has been consolidated as of the beginning of 2004.

Net income *before* realized gains and losses on shares and real estate and before exceptional items increased 9% to EUR 1,386 million in 2004 (17% on a constant currency basis). This increase reflects considerable improvement in results from AEGON's country units, more than offsetting the lower income from the TFC operations that remained in 2004 (a net loss of EUR 20 million compared to a net profit of EUR 218 million in 2003). Net income, which includes realized gains and losses on shares and real estate and an EUR 218 million exceptional charge, increased to EUR 1,663 million compared to EUR 1,033 million in 2003. The exceptional charge relates to the agreement with Dexia that resolved the dispute over the sale of Labouchere to Dexia in 2000. The effective tax rate declined to 24% in 2004 from 32% in 2003 primarily reflecting higher realized gains on tax preferred investments in the Netherlands and a one-time reduction in taxes in the United States.

Commission and expenses increased 8% to EUR 5,756 million in 2004. Total operating expenses were 10% higher than in 2003 at EUR 3,111 million. However, EUR 291 million of the increase was caused by the consolidation of the remaining TFC activities in 2004. Excluding this effect, operating expenses were level with 2003 (5% higher on a constant currency exchange rate basis). The main factors impacting expenses include, additional employee pension expense, post retirement benefits costs and increased regulatory and compliance costs, offset by expense savings in operating units.

Revenue generating investments amounted to EUR 296 billion on December 31, 2004. This represents an increase of 4% over the prior year. At constant currency exchange rates the increase amounted to 9%.

In the Americas, income before realized gains and losses on shares and real estate increased by 29% to USD 1,931 million (EUR 1,553 million). The Americas represented 69% of income before realized gains and losses on shares and real estate generated by the country units. Driving the improvement were lower bond defaults, improved equity markets and improved product spreads. Standardized new life production increased 5% to USD 1,087 million (EUR 874 million) on a comparable basis to 2003.

In the Netherlands, income before realized gains and losses on shares and real estate rose 16% to EUR 352 million. The Netherlands represented 16% of income before realized gains and losses on shares and real estate generated by the country units. The increase in earnings in the Netherlands is primarily driven by lower additions to provisions for guarantees and financial risks and higher technical results. Standardized new life production decreased 17% to EUR 227 million.

In the United Kingdom, income before realized gains and losses on shares and real estate increased 16% to GBP 151 million (EUR 222 million). The UK represented 10% of income before realized gains and losses on shares and real estate generated by the country units. The increase in earnings primarily reflects higher policy fee income related to an average 12% higher FTSE level compared to 2003. Standardized new life production increased 4% to GBP 662 million (EUR 976 million), reflecting the consistent growth achieved in the pensions business, partially offset by lower asset management institutional sales.

Income before realized gains and losses on shares and real estate in Other countries increased 43% to EUR 109 million. Other countries represented 5% of income before realized gains and losses on shares and real estate generated by the country units. The increase in earnings primarily reflects a strong improvement in non-life insurance results in Spain.

Shareholders' equity at December 31, 2004, amounted to EUR 14,413 million, an increase of EUR 466 million compared to December 31, 2003. At December 31, 2004, shareholders' equity represented 72% of AEGON's total capital base, exceeding the target of at least 70%. The quality of AEGON's capital base was further strengthened in 2004 by the issuance of EUR 950 million and USD 500 million in Junior Perpetual Capital Securities, the proceeds of which were used to refinance senior debt.

¹ Includes also variable annuities and fee business.
2 Effective January 1, 2004, for reasons of consistency, additional variable universal life premiums, in the past recognized as single premiums, have been reclassified to renewal premiums.

The Americas (the AEGON USA companies and AEGON Canada)

- Income before realized gains and losses on shares and real estate increased 29% to USD 1,931 million in the Americas.
- Total revenue generating investments rose 11% from year-end 2003 to USD 252 billion.
- Additions to the default provision in the United States were USD 204 million compared to USD 516 million in 2003.
- Standardized new life production increased 5% to USD 1,087 million on a comparable basis to 2003.
- Excluding additional employee pension plan expenses, operating expenses of USD 1,819 million were level compared to 2003.

Results

Income before realized gains and losses on shares and real estate increased 29% to USD 1,931 million for 2004. Improved credit and equity markets, along with increased product spreads have driven the improvement. Net income, which includes realized gains and losses on shares and real estate, increased to USD 1,569 million for 2004. Realized net gains on shares and real estate were USD 276 million compared to a realized net loss of USD 74 million for 2003.

For the fourth quarter of 2004, income before realized gains and losses on shares and real estate increased 9% to USD 468 million, compared to the fourth quarter of 2003. Fourth quarter 2004 results include lower bond default reserve additions, strong organic growth and increased product spreads, offset by a net charge for one-time reserve adjustments related to the reinsurance business. Net income, which includes realized gains and losses on shares and real estate, increased 62% to USD 447 million compared to the fourth quarter of 2003. The effective tax rate in the fourth quarter was lower than in the same period of the prior year as a result of a one-time reduction in taxes related to the repatriation of accumulated earnings from Canada pursuant to the American Jobs Creation Act (USD 63 million).

Total revenues of USD 18,341 million for 2004 increased 11% compared to 2003. Life insurance gross premiums of USD 8,104 million increased 16%, accident and health insurance premiums of USD 2,541 million increased slightly. A combination of increased sales, investment income and higher fee income due to increased assets under management contributed to the overall increases.

Investment income of USD 6,687 million was 10% higher than 2003. Although new money rates continue to be low, net realized gains on shares and real estate and growth in the general account portfolio have contributed to the increase in investment income.

Traditional/Account of Policyholders

Standardized new life production increased 5% to USD 1,087 million during 2004 on a comparable basis to 2003. Retail standardized new life production increased to USD 780 million or 4% on a comparable basis. Strong organic growth through solid recruiting contributed to the increase. Standardized new life production in the fourth quarter of 2004 increased 5% to USD 303 million on a comparable basis to 2003. Single premium Bank-Owned and Company-Owned Life Insurance sales were particularly strong in the fourth quarter. These sales tend to be large and less predictable in nature.

Traditional life income before realized gains and losses on shares and real estate of USD 649 million increased 4% compared to 2003. The comparable 2003 results included a USD 70 million property insurance recovery. Contributing to the increase in 2004 were lower bond defaults, improved product spreads and strong business growth. These improvements were partially offset by a non-recurring reserve increase in the reinsurance business of USD 80 million, consisting primarily of a change in methodology for computing incurred but not reported claims and for the conversion to a

new reserve system. The model and system changes reflect the ability to compute reserves on more specific information from ceding companies. Mortality experience continues to be favorable relative to pricing expectations when measured over a longer horizon.

Life for account of policyholders income before realized gains and losses on shares and real estate of USD 101 million increased 49% for 2004 compared to 2003. Higher fee income due to asset growth in the portfolio combined with favorable mortality and persistency experience contributed to the earnings growth.

Fixed annuities

Deposits of USD 603 million during the fourth quarter and USD 3,017 for the year declined 29% and 42%, respectively, from the comparable 2003 periods. Lower fixed annuity production reflects AEGON's continued pricing discipline in this market, which has been affected by the current low interest rate environment. Fixed annuity balances of USD 44.1 billion declined slightly from 2003.

Fixed annuity income before realized gains and losses on shares and real estate of USD 389 million for 2004 increased 22% compared to 2003. Lower bond defaults and improved product spreads were the primary drivers of the earnings growth. Fourth quarter results were USD 103 million, or 10% below the same period last year. The fourth quarter 2003 results included one time favorable additions to earnings of USD 11 million related to a property insurance settlement and lower DPAC amortization. The product spread on the largest segment of the fixed annuity book was 234 basis points for the fourth quarter of 2004, which is an increase of 42 basis points from the comparable spread for the same period last year.

Compared to the third quarter this year, the product spread on the largest segment of the fixed annuity book increased 21 basis points. While bond and mortgage yields dropped 4 basis points during the quarter, higher equity related income of 15 basis points, higher cash yields and higher amortization of prior deferred bond gains contributed to the overall increase in spread. Adding back pricing defaults and investment expenses, the gross spread for the fourth quarter 2004 was 278 basis points compared to 236 basis points for the fourth quarter 2003.

GICs and funding agreements

GIC and funding agreement production of USD 9.5 billion increased slightly in 2004 compared to 2003. Higher traditional GIC sales were partially offset by lower medium term funding agreement sales. The tight credit spreads have negatively impacted sales in 2004 as disciplined pricing has been maintained to achieve returns. GIC and funding agreement balances have increased 8% to USD 29.4 billion from year-end 2003.

GIC and funding agreement income before realized gains and losses on shares and real estate increased 37% to USD 254 million compared to 2003. Lower defaults, asset growth and a one-time positive effect of USD 16 million received in the first quarter of 2004 related to the performance of a loan portfolio more than offset a 2003 property insurance settlement and interest from a tax refund.

Variable annuities

Variable annuities account balances have increased 9% to USD 46.2 billion in 2004. Variable annuity deposits of USD 5.6 billion decreased 12% in 2004 compared to 2003. The decrease is due to the discontinuance of the guaranteed minimum income benefit (GMIB) feature in the first quarter of 2003, as part of AEGON's disciplined approach to write profitable business at acceptable risk profiles. AEGON introduced the "5 for life" guaranteed minimum withdrawal benefit during the fourth quarter of 2004 to complement the existing "Guaranteed Principal Solution" rider introduced at the beginning of the year. Initial reactions from the wirehouse distribution networks are encouraging. Variable annuity production of USD 1,478 million in the fourth quarter increased 19% compared to the third quarter of 2004.

Income before realized gains and losses on shares and real estate in the variable annuity line of business increased to USD 200 million in 2004 from USD 68 million in 2003. Improved equity market performance resulting in higher fees, more favorable persistency, lower guaranteed death benefit costs and reduced operating expenses contributed to the significant earnings growth.

Fee business

Fee based products include managed assets such as mutual funds, collective investment trusts and synthetic GICs. Production for 2004 totaled USD 18.4 billion, a 14% decrease compared to 2003. Mutual fund sales of USD 11.2 billion for 2004 increased 35% over 2003, reflecting the expanded marketing relationships with wirehouse networks. Synthetic GIC sales of USD 7.3 billion decreased 45% as equity-like products are now attracting more funds than stable value alternatives. Total fee based assets have increased 20% to USD 76.2 billion from year-end 2003.

Fee business income before realized gains and losses on shares and real estate was USD 17 million in 2004 compared to a loss of USD 20 million for 2003. The 2004 income was positively impacted by growth in assets due to mutual fund deposits and equity market appreciation. The 2003 results were negatively impacted by a large accrual for a long-term formula based deferred compensation plan related to participation in an investment management company.

Accident and health business

Accident and health premiums of USD 2,541 million increased slightly in 2004 compared to 2003. Offsetting increased sales through sponsored programs and rate increases on certain health products were lower Long Term Care sales. As previously announced, sales through the Long Term Care Division will cease during the first half of 2005.

Accident and health income before realized gains and losses on shares and real estate of USD 321 million increased 26% in 2004 compared to 2003. Lower defaults, favorable claims experience and premium rate increases all contributed to the increase in earnings.

Commissions and expenses

Commissions and expenses include commissions, operating expenses and the net change in policy acquisition costs. Commissions and expenses of USD 4,191 million increased 9% in 2004 compared to 2003.

Excluding additional employee pension plan expense, operating expenses of USD 1,819 million were level compared to 2003. Additional employee pension expense, increased operating expenses USD 53 million for the year. Higher regulatory and compliance costs were offset by expense savings in the operating units.

 $^{^3}$ Reflected in the column total year 2004 is a reclassification of EUR 62 million from general account

recurring premiums to policyholders account recurring premiums relating to Q1 2004.

Reflected in the column total year 2004 is an adjustment of EUR 410 million to savings deposits relating to Q1 2004.

AEGON The Netherlands

- Income before realized gains and losses on shares and real estate increased 16% to an amount of EUR 352 million.
- Total revenue generating investments rose 7% to EUR 56 billion from year-end 2003.
- Standardized new life production, compared to the full year 2003, declined 17% to EUR 227 million. Fourth quarter 2004 standardized new life production of EUR 73 million decreased 10% compared to the fourth quarter 2003 but doubled compared to the third quarter 2004.
- Operating expenses in 2004 decreased 2% on a comparable basis.

Results

Income before realized gains and losses on shares and real estate totaled EUR 352 million in 2004, a 16% increase compared to the year 2003. The increase in 2004 income before realized gains and losses on shares and real estate mainly reflects lower additions to provisions for credit risk and minimum guarantees. Net income, which includes realized gains and losses on shares and real estate, amounted to EUR 637 million, compared to a net profit of EUR 25 million in 2003.

Income before realized gains and losses on shares and real estate for the fourth quarter of 2004 amounted to EUR 89 million, an 18% decline compared to the same period in 2003 and a 1% increase compared to the third quarter 2004. The decline in fourth quarter income before realized gains and losses on shares and real estate compared to the same period in 2003 reflects increased profit sharing to clients, costs in relation to the restructuring process and higher pension expenses. Net income for the fourth quarter amounted to EUR 266 million, compared to EUR 45 million in the same period in 2003 and EUR 136 million in the third quarter 2004.

Net realized gains on shares and real estate amounted to EUR 368 million on a pre-tax basis in 2004, compared to net realized losses of EUR 191 million in 2003. Fourth quarter 2004 net realized gains on shares and real estate amounted to EUR 184 million, compared to net realized losses of EUR 30 million in the fourth quarter of 2003 and net realized gains of EUR 79 million in the third quarter of 2004.

Traditional/Account of policyholders

Overall standardized new life production declined 17% compared to 2003 to EUR 227 million. This reflects lower single premium immediate annuity production as a consequence of the focus on profitability over volume. The new organization will improve intermediary distribution.

In the fourth quarter of 2004, standardized new life production amounted to EUR 73 million, a decline of 10% compared to the fourth quarter 2003 but double the amount achieved in the third quarter 2004. Strong performance was realized in single premiums, with the sales center Corporate and Institutional Clients concluding several large contracts.

Traditional life income before realized gains and losses on shares and real estate was stable at EUR 196 million in 2004. Life for account of policyholders income before realized gains and losses on shares and real estate increased by EUR 24 million to EUR 42 million, primarily reflecting lower additions to the provision for guarantees.

Fee business

Income before realized gains and losses on shares and real estate on fee business more than doubled in 2004 to EUR 28 million, reflecting the inclusion of TKP and AEGON Asset Management.

Off balance sheet production decreased by 78% compared to the strong 2003.

Non-life insurance

Accident and health income before realized gains and losses on shares and real estate decreased 36% to EUR 28 million, reflecting a more normalized claims experience after a particularly favorable 2003. Accident and health premiums rose 15% compared to the prior year to EUR 187 million, mainly on the back of successful performance in the Sick Leave segment.

General insurance income before realized gains and losses on shares and real estate improved to EUR 36 million from EUR 11 million in 2003. This is driven by continued favorable claims experience, particularly in Fire.

Banking activities

Income before realized gains and losses on shares and real estate from banking activities increased by 10% compared to 2003 to EUR 22 million. The increase is largely attributable to lower additions to the provisions for credit risks and cost savings, offsetting the pressure on margins. Savings account balances declined 2% compared to year-end 2003 levels at EUR 5.5 billion. New deposits were unchanged at EUR 2.9 billion.

Commission and expenses

Commission and expenses of EUR 1,098 million were 15% higher than in 2003. Operating expenses, which include a contribution to the provision for post-retirement benefits, amounted to EUR 670 million, 16% higher than in the previous year and impacted by among others restructuring expenses and higher pension expense. On a like-for-like basis, operating expenses decreased 2%.

¹ Includes also fee business.

AEGON UK

- Income before realized gains and losses on shares and real estate increased 16% to GBP 151 million.
- Total revenue generating investments increased 6% to GBP 36 billion compared to year-end 2003 levels.
- Standardized new life production increased by 4% to GBP 662 million.
- Operating expenses decreased 1% in 2004. Included in operating expenses is GBP 10 million restructuring costs, of which GBP 5 million was booked in the fourth quarter.

Results

Income before realized gains and losses on shares and real estate increased totaled GBP 151 million in 2004, a 16% increase compared to the year 2003. Net income, which includes realized gains on shares and real estate, increased 23% to GBP 106 million.

Income before realized gains and losses on shares and real estate for the fourth quarter of 2004 amounted to GBP 41 million, an 8% increase compared to the same period in 2003 and level with the third quarter 2004. Net income for the fourth quarter amounted to GBP 27 million, a 17% increase over the same period in 2003 and a 10% decline compared to the third quarter 2004.

The increase in income before realized gains and losses on shares and real estate during 2004 primarily reflects higher policy fee income related to an average 12% higher FTSE level compared to 2003. The increase in fourth quarter income before realized gains and losses on shares and real estate compared to the same period in 2003 is mainly due to market effects and new business.

Realized gains and losses on shares and real estate amounted to net losses of GBP 3 million in 2004, all in the fourth quarter, compared to net realized losses of GBP 10 million in 2003. Net realized losses amounted to GBP 6 million in the fourth quarter of 2003.

Traditional/Account of policyholders

Standardized new life production increased 4% compared to 2003 to GBP 662 million, reflecting growth in the core individual and group pensions businesses, partly offset by a fall in asset management institutional sales. The increased production demonstrates the consistent growth of AEGON UK, achieved in times of substantial changes in the organization and the market.

In the fourth quarter of 2004, standardized new life production amounted to GBP 169 million, an increase of 2% compared to the same period in 2003 and a 6% increase over the level achieved in the third quarter of 2004.

Income before realized gains and losses on shares and real estate from traditional life amounted to a loss of GBP 7 million during in 2004. Within this business line in 2003 and 2004 the result included GBP 10 million of provisions for the cost management program. In 2003 the effect of this provision was mitigated by a number of one-off mortality profits and provision releases.

Income before realized gains and losses on shares and real estate from life for account of policyholders was GBP 154 million, an increase of 20% compared to 2003. This mainly reflects the higher average FTSE level and related higher management fees.

Fee business

Lower expenses in our asset management business have contributed to the overall increase in results in the fee business segment. Income before realized gains and losses on shares and real estate in this segment improved to GBP 4 million compared to GBP 1 million in 2003.

Commission and expenses

Commission and expenses decreased 4% to GBP 426 million. This is largely due to lower amortization of deferred policy acquisition cost, partially offset by growth in the distribution companies (including acquisitions).

Operating expenses declined 1% to GBP 333 million, including GBP 24 million of cost reductions due to the cost reduction programs, which has been partially offset by growth in IFA's owned by AEGON. The total charge related to the cost reduction program amounted to GBP 10 million, of which GBP 5 million has been accounted for in the fourth quarter of 2004.

AEGON UK has announced reductions in commission levels for regular premium pension business, which will take effect during 2005.

Other countries

- Income before realized gains and losses on shares and real estate increased 43% to EUR 109 million.
- Total revenue generating investments increased 20% to EUR 3.7 billion compared to year-end 2003 levels.
- Standardized new life production, when compared to the full year 2003, declined by 39% to EUR 245 million. Fourth quarter 2004 standardized life production of EUR 70 million decreased 31% compared to the fourth quarter of 2003, but increased 8% compared to the third quarter of 2004, driven by substantially higher production in Taiwan than in the previous quarters.
- Operating expenses rose 4% to EUR 118 million on a comparable basis.

Results

Income before realized gains and losses on shares and real estate amounted to EUR 109 million in 2004, a 43% increase compared to the year 2003. Net income, which includes realized gains and losses on shares and real estate, increased 60% to EUR 91 million. For the fourth quarter, income before realized gains and losses on shares and real estate amounted to EUR 24 million, a 60% increase compared to the fourth quarter of 2003 and a decrease of 31% compared to the third quarter of 2004. Net income for the fourth quarter amounted to EUR 25 million, compared to EUR 12 million in the same period in 2003 and EUR 25 million in the third quarter 2004.

On December 30, 2004, AEGON N.V. announced that it had entered into an agreement to sell AEGON Seguros Generales, its general insurance subsidiary in Spain, to Italian mutual insurance company Reale Mutua Group effective January 1, 2005. The price of the sale is approximately EUR 250 million and will be fixed at completion. The transaction will result in a book profit of approximately EUR 130 million after tax. The sale is subject to regulatory approval and is expected to be completed in the second quarter of 2005. The proceeds will be used to redeem debt.

AEGON's general insurance activities in Spain generated gross premiums of EUR 254 million and pre-tax income of EUR 53 million in 2004. As part of the agreement, AEGON Seguros Generales' distribution network in Spain, which in the transaction will be transferred to Reale Mutua Group, will continue to sell AEGON's life and health insurance products. At the same time, AEGON will acquire the life portfolio of Reale Vida in Spain (with total premium of EUR 14 million in 2004), which will give AEGON access to Reale Mutua's existing agent distribution network. The distribution agreements are on an exclusive basis, valid for five years and renewable thereafter.

This transaction reinforces AEGON's strategic focus on its core businesses of life insurance, pensions, savings and investment products. AEGON will continue to expand its life insurance business in Spain by further strengthening its own agent distribution capability, by enhancing its existing bancassurance partnership with Caja de Ahorros del Mediterráneo (CAM) and by pursuing new distribution opportunities.

Traditional/Account of policyholders

Standardized new life production decreased 39% to EUR 245 million, largely driven by lower production in Taiwan, following very strong sales in the comparable period last year. In the fourth quarter 2004 standardized new life premium amounted to EUR 70 million, a decline of 31% compared to the fourth quarter of 2003, but representing an 8% increase compared to the third quarter of 2004.

New life production in Taiwan declined 41% to NTD 7,790 million (EUR 187 million) in 2004. This reflects the industry-wide decrease in traditional life business, while AEGON has chosen not to participate in single premium structured note and interest sensitive annuity products given the inherent risks in those products. Gross premium income for 2004 as a whole at NTD 25 billion

(EUR 599 million) increased 39% due to new production and good persistency. In the fourth quarter of 2004, standardized new life production in Taiwan amounted to NTD 2,389 million (EUR 55 million). While this represents a 30% decrease compared to the exceptionally strong final quarter of 2003, the fourth quarter saw a strong improvement compared to previous quarters and represented 31% of total production for the year as well as a 17% rise compared to the third quarter of 2004.

In Hungary, standardized new life production showed a 12% decline to HUF 4,620 million (EUR 18 million), while off balance sheet pension production increased by 27% to HUF 51,350 million (EUR 204 million) on the back of a continued strong expansion in the pension fund management business. AEGON Hungary is one of the leading pension fund companies in the country.

In Spain, standardized new life production increased 20% to EUR 36 million. The partnership with CAM had a successful start, generating premium income over 2004 of EUR 501 million (100% basis, full year) of which EUR 289 million related to new business. The partnership with CAM is not consolidated in AEGON's accounts.

Non-life insurance

Total non-life insurance premiums increased 9% to EUR 456 million compared to EUR 420 million in 2003. In Hungary, non-life premiums increased by 18% to HUF 28.9 billion (EUR 115 million) mainly as a result of successful car insurance sales. Non-life premiums in Spain increased 6% to EUR 341 million mainly coming from personal lines and small business insurance.

Non-life results increased 41% compared to 2003. Accident and health results improved from EUR 7 million to EUR 8 million, while general insurance results showed a 45% increase to EUR 71 million. This is particularly driven by a strong increase in Spain on the back of improved claims ratios.

Commission and expenses

Commission and expenses increased by 4% to EUR 290 million in 2004. Operating expenses rose 4% to EUR 118 million on a comparable basis.

Non-consolidated ventures

AEGON's share in the results of the partnership with CAM and the share in the results of La Mondiale Participations are accounted for on a net basis under Non consolidated ventures. Previously, these items were accounted for under Interest charges and other.

The income from Non consolidated ventures amounted to EUR 9 million. This represents the income on the partnership with CAM (49.99% interest) since it became operational in June 9, 2004 and the income on the stake in La Mondiale Participations for the full year. On December 13, 2004 La Mondiale and AEGON strengthened their partnership by an increase of ownership from 20% to 35% in La Mondiale Participations.

REPORT OF THE HOLDING COMPANY

Capital and funding

Shareholders' equity at December 31, 2004, amounted to EUR 14,413 million, an increase of EUR 466 million compared to December 31, 2003. The increase is largely due to net income of EUR 1,663 million, the EUR 154 million book gain on the disposal of TFC businesses and an increase in the revaluation reserve of EUR 55 million. Partly offsetting these positive influences were currency influences EUR 775 million, dividend payments of EUR 351 million and a goodwill charge of EUR 265 million related to the acquisitions of distribution companies in the Netherlands and the United Kingdom, the partnership with CAM in Spain and the increase in the stake in La Mondiale Participations. The revaluation reserve amounted to EUR 1,448 million on December 31, 2004, compared to EUR 1,393 million at year-end 2003.

At December 31, 2004, shareholders' equity represented 72% of AEGON's total capital base and is well within AEGON's targets. Senior and dated subordinated debt comprised 12% of the total capital base. Capital securities accounted for the remaining 16%.

In July of 2004, AEGON successfully completed the issuance of EUR 500 million and USD 250 million in Junior Perpetual Capital Securities. AEGON reopened the Junior Perpetual Capital Security issue and the amount outstanding increased to EUR 950 million and USD 500 million in October 2004. The proceeds of the issue were used to refinance maturing senior debt. These transactions further strengthened the quality of AEGON's capital base.

On July 9, 2004, Moody's changed its outlook on AEGON debt ratings from negative to stable. The rating agency also affirmed its insurance financial strength ratings (IFSR) on AEGON's U.S. operating companies, as well as its rating on AEGON's main U.K. operating company.

On November 4, 2004 AEGON announced the sale of TFC's maritime container leasing business to TAL International Group, Inc. for a purchase price of USD 1.2 billion. AEGON has used the net proceeds to redeem debt.

On December 30, AEGON announced the sale of the general insurance activities in Spain to Reale Mutua, effective January 1, 2005. The transaction will result in a book profit of approximately EUR 130 million after tax, to be recorded in 2005.

Dividend

At the Annual General Meeting on April 21, 2005, the Executive Board will propose a total dividend for 2004 of EUR 0.42 per common share, a 5% increase compared to the 2003 dividend. Taking into account the interim dividend of EUR 0.21 paid in September 2004, the proposed final dividend will amount to EUR 0.21 per common share.

The final dividend will be paid in cash or shares, at the election of the shareholder. The value of the stock dividend will be approximately 5% higher than the value of the cash dividend. The stock fraction for the stock dividend will be based on the average price of the AEGON share on the Euronext Amsterdam stock exchange for the five trading days from May 3, 2005, up to and including May 9, 2005. The record date for the dividend will be April 22, 2005, for both AEGON's Euronext shares and the New York Registry Shares. AEGON's shares will be trading ex-dividend on April 25, 2005. AEGON's New York registry shares will be trading "Due Bills" from April 20, 2005 up to and including April 24, 2005. The final dividend will be payable as of May 17, 2005.

Interest charges and other

Interest charges and other increased 6% to EUR 453 million from EUR 429 million in 2003. The consolidated TFC businesses, mainly consisting of maritime container and European trailer leasing, were reported under Interest charges and other in 2004. In 2004, TFC reported a loss of EUR 46 million before tax. Interest expenses declined by EUR 51 million compared to the prior year.

Subsequent events

On February 11, 2005, AEGON announced it had reached agreement with Dexia and resolved the dispute over the sale of Labouchere to Dexia in 2000, pursuant to which AEGON paid EUR 218 million to Dexia in full and final settlement. This agreement ends a dispute that otherwise could have lasted for many years and does not constitute an admission of the allegations made by Dexia. The payment has been charged by AEGON as an exceptional item in the full year 2004 results.

On February 16, 2005, AEGON announced it had reached agreement on the sale of TFC's European trailer leasing business. Together with the sale of the maritime container leasing business, AEGON has completed the divestiture of its non-core TFC operating businesses. The financial effect of these divestitures, which under Dutch Accounting Principles has been reported in shareholders' equity in 2004, was not material.

Explanatory notes

The published figures are unaudited.

Traditional life includes income on traditional and fixed universal life products.

Life insurance with investments for account of policyholders includes income on variable universal life, unitised pension (UK), other unit-linked products with investments for account of policyholders and with profit fund in the UK.

Fee business includes income on off balance sheet type products.

Gross margin is calculated as the sum of income before realized gains and losses on shares and real estate and commissions and expenses.

Currencies

Income statement items: average rate 1 EUR = USD 1.2436 (2003: USD 1.1311). Balance sheet items: closing rate 1 EUR = USD 1.3621 (2003: USD 1.2630).

Supplemental disclosure

Comparability adjustments made to certain amounts reported in the 2003 financials.

The adjustments made to the 2003 financial amounts presented in this report are made for comparability purposes.

The following adjustments have been adopted as of January 1, 2004:

- Discontinuance of the indirect income method. Gains and losses on shares and real estate are no longer recognized in the income statement by applying the indirect income method, but instead are recognized when realized.
- Statement of Position (SOP) 03-1 issued by the Accounting Standards Executive Committee (AcSEC) of the AICPA. SOP 03-1 addresses a number of items within FAS 97, resulting in a change in the opening balance of shareholders' equity at January 1, 2004, of EUR 185 million. The effects of the adoption of SOP 03-1 are relevant for the Americas and the Group totals only.

Non-GAAP measures (Regulation G)

This press release includes a non-GAAP financial measure: Net income before realized gains and losses on shares and real estate and before exceptional items. The reconciliation of this measure to the most comparable GAAP measure is shown below in accordance with Regulation G. AEGON believes the non-GAAP measure shown herein, together with the GAAP information, provides a meaningful measure for the investing public to evaluate AEGON's business relative to the businesses of our peers.

	In EUR million	Per common share	In EUR million	Per common share

Local currencies and constant currency exchange rates

This press release contains certain information about our results and financial condition in USD for the Americas and in GBP for the United Kingdom because those businesses operate and are managed primarily in those currencies. Certain comparative information presented on a constant currency basis eliminates the effects of changes in currency exchange rates. None of this information is a substitute for or superior to financial information about us presented in euro, which is the currency of our primary financial statements.

Forward looking statements

The statements contained in this press release that are not historical facts are forward-looking statements as defined in the U.S. Private Securities Litigation Reform Act of 1995. Words such as 'believe', 'estimate', 'intend', 'may', 'expect', 'anticipate', 'predict', 'project', 'counting on', 'plan', 'continue', 'want', 'forecast', 'should', 'would', 'is confident' and 'will' and similar expressions as they relate to us are intended to identify such forward-looking statements. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions that are difficult to predict. We undertake no obligation to publicly update or revise any forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of their dates.

All forward-looking statements are subject to various risks and uncertainties that could cause actual results to differ materially from expectations, including, but not limited to, the following:

- Changes in general economic conditions, particularly in the United States, the Netherlands and the United Kingdom;
- Changes in the performance of financial markets, including emerging markets, including:
 - The frequency and severity of defaults by issuers in our fixed income investment portfolios; and
 - The effects of corporate bankruptcies and/or accounting restatements on the financial markets and the resulting decline in value of equity and debt securities we hold;
- The frequency and severity of insured loss events;
- Changes affecting mortality, morbidity and other factors that may affect the profitability of our insurance products;
- Changes affecting interest rate levels and continuing low interest rate levels and rapidly changing interest rate levels;
- Changes affecting currency exchange rates, including the EUR/USD and EUR/GBP exchange rates:
- Increasing levels of competition in the United States, the Netherlands, the United Kingdom and emerging markets;
- Changes in laws and regulations, particularly those affecting our operations, the products we sell and the attractiveness of certain products to our consumers;
- Regulatory changes relating to the insurance industry in the jurisdictions in which we operate;
- Acts of God, acts of terrorism and acts of war;
- Changes in the policies of central banks and/or foreign governments;
- Litigation or regulatory action that could require us to pay significant damages or change the way we do business;
- Customer responsiveness to both new products and distribution channels;
- Competitive, legal, regulatory, or tax changes that affect the distribution cost of or demand for our products;
- Our failure to achieve anticipated levels of earnings or operational efficiencies as well as other cost saving initiatives;
- The impact on our reported financial results and financial condition as a result of our adoption of International Financial Reporting Standards.
